2020 Annual Water Quality Report - ADDENDUM

(Testing Performed January through December 2019)

ALEXANDER CITY WATER DEPARTMENT

PWSID 1265

P.O. Box 552

Alexander City, AL 35011

(256) 409-2030

Alexander City Water Department is required to monitor your drinking water for specific contaminants on a regular basis. Results of regular drinking water monitoring are an indicator of whether or not your drinking water meets health standards. During JANUARY – MARCH 2019, we did not monitor for Disinfection ByProducts (DBP) in the correct time frame, and therefore cannot be sure of the quality of your drinking water during that time.

Please share this information with all the other people who drink this water, especially those who may not have received this note directly (For example, people in apartments, nursing homes, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

After this error, a new schedule with the testing laboratory was set and there have not been any further monitoring oversights. There have not been any additional monitoring issues after the first quarter of 2019. Although, due to the failure of collecting samples in the proper monitoring period, MCL violations occurred for three subsequent quarters.

Should you have any questions concerning this non-compliance or monitoring or monitoring requirements, please contact the Adams Water Treatment Plant at 256-409-2035.
